IN FEW WORDS

I am ux designer and digital project manager. For 10 years I have been working on design digital products with a creative approach. I work and interact with developers to create the best products for final users. I bring a vision, a user experience, and an art direction in all of products I work on. I know how to create engaging and frictionless experience. I try to make technology disappear and work in a holistic way.

MY SKILLS

USER EXPERIENCE

- user research
- design thinking
- sprint design
- prototyping
- usability test

DESIGN

- Sketch, Adobe CC
- Invision
- styleguides
